

The Airl network is a Christian Music network supported by listener donations. This network utilizes FM translators for much of their local broadcasting, which would be disrupted if the Low Power FM format is given priority.

I believe Airl provides an important alternative music format to the listeners in our area. Airl broadcasts modern Christian music that is acceptable to teenage listeners (that is quite an accomplishment!) , as well as adults.

The format provided by Airl, and the content of the songs played there, are inspirational and encourage peace, calm, and tolerance in the listeners. Considering the amount of drugs and violence present in the lyrics of most modern music, to remove this format would severely offset the balance of what is available to the public.

Thank you for considering my opinion in your decision making process.

Sincerely, David Hyde.
